

JOSHUA VIERA

New York, NY · (347) 951-0193 · joshuaviera95@gmail.com · [GitHub](#) · [LinkedIn](#)

AI-native software engineer with 7+ years of experience across full-stack web and iOS development. Fluent in using LLMs as genuine collaborators for architecture decisions, debugging, and delivery, not just autocomplete. Non-traditional path turned into an advantage: operational leadership, strong communication, and a bias toward shipping real things.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Swift, Python, HTML5, CSS3, SQL

Frameworks & Tools: React, Next.js, Node.js, React Native, Supabase, Firebase, Tailwind CSS, Git/GitHub, Vercel, Xcode

AI-Native: LLM API integration (OpenAI GPT-4, Google Gemini, Claude), prompt engineering, AI-assisted development workflows, AI product development

PROJECTS

Relay AI — Triage System Rebuild — *Next.js · TypeScript · NLP · AI Accuracy Engineering*

- Diagnosed a customer triage algorithm operating at ~60% accuracy; rebuilt urgency-detection logic using weighted NLP signals, pushing accuracy to ~93%
- Redesigned the History page UX based on usability gaps identified in the existing system
- Framed technical improvements in business terms for a CEO-facing presentation, translating engineering decisions into revenue and retention impact

ArchiveAI — *Next.js · TypeScript · LLM APIs · Voice Cloning*

- Co-building a LinkedIn voice-cloning and post-generation tool for solo consultants and freelancers, allowing users to generate on-brand content without writing from scratch
- Authored the full PRD (v1.1) and built a functional React prototype with four core screens: upload flow, archive dashboard, generate screen, and re-voice screen

SnowGo — AI Snow Removal Marketplace — *React Native · Expo · Supabase · GPT-4 Vision · Stripe*

- Led the technical build of a two-sided marketplace mobile app connecting homeowners with snow removal providers
- Integrated GPT-4 Vision for property analysis from photos; implemented Stripe for payments and Supabase for auth and real-time data

Daily Vow — AI Habit Tracker — *Next.js · TypeScript · Supabase · Google Gemini API*

- Built and deployed a full-stack habit accountability app integrating Google Gemini to transform vague personal goals into structured, measurable commitments through a conversational AI interface
- Implemented Supabase authentication, Row-Level Security, streak tracking, and full CRUD; prioritized accessibility with semantic HTML and keyboard navigation

EDUCATION

AI-Native Program | [Pursuit Fellowship](#) | Long Island City, NY Sep 2025 – Present

- Project-based program building AI-native software products using modern system design, LLM APIs, and full-stack web + iOS development

Software Engineering Fellowship (iOS & Web) | [Pursuit Fellowship](#) | Long Island City, NY 2018 – 2019

- Intensive 10-month, Google-funded fellowship (9% acceptance rate); 1,000+ hours of Swift, JavaScript, data structures, algorithms, code review, and pair programming

EXPERIENCE

Field Technician / Engineer | [DataComm Solutions](#) | UK & New York Jan 2024 – Dec 2024

- Installed, maintained, and optimized server infrastructure and containment systems across international deployment sites

- Configured network protocols and virtualization technologies; enforced security, privacy, and efficiency standards

Regional Manager | [Labworq](#) | Brooklyn, NY / Los Angeles, CA Dec 2020 – 2022

- Directed company expansion from NYC to Los Angeles — recruited and trained staff, established payroll systems, and managed cross-coastal logistics for a rapidly scaling team
- Designed compliance policies and operational control systems adopted company-wide

Logistics Manager | [Momentum Mixology](#) | Queens, NY Jan 2018 – Mar 2021

- Developed a proprietary warehouse inventory system that optimized cost-to-service levels and reduced operational waste
- Managed high-volume daily shipping/receiving and trained new hires on FIFO protocols and production workflows
